

Fowler

Anvil Kit and Ball Attachment

▲ Anvils left to right: Blade, Point, Knife, Disc, Spline, and Super Spline

▲ Micrometer Anvil Kit #52-249-007.

#52-249-007 Features:

- Fowler's Multi-Mike Micrometer Anvil Kit contains six anvils and a ball attachment
- Popular accessories used with outside micrometers. Anvils fit any micrometer 1"—12", inch or metric.
- Each anvil is .500" long and is held on with its own reinforced neoprene boot.
- Anvils are hardened and ground alloy steel with a lapped measuring surface.
- Made in the U.S.A. to exacting standards.

▲ Ball Attachment #52-285-000.

#52-285-000 Features:

- Ball Attachment used on spindles or anvils. Allows for single point inside contact and measurements of cylindrical wall thicknesses.
- Fits micrometers with spindle diameters of .235", .250", .256" and .270".
- Reinforced rubber boot provides extra holding power.
- Used with outside micrometers.
- Hardened chrome alloy steel.
- Ball: diameter .200"; accuracy 0.000025"
- Price includes 2 balls, 1 boot and case.
