

Large Capacity Dial Gage Stands

Indicator mounts allow for either stem or standard lug mounting. Indicators shown, not included.

▲54-580-118

Fowler's new Gage stands offer greater stability by mounting both the indicator and the measuring platen to the column. This helps to avoid gaging inaccuracies caused by deflection in the column with traditional gage stands.

The indicator mounts to the top of the column and does not move, allowing for the operators viewing position to remain constant. The measuring surface easily adjusts vertically to allow for varying thickness of work pieces and rotates to accommodate different gage mounts.

- Sturdy mounting base
- Working surface is hardened, ground and lapped.
- Column diameter 1¹/₄
- Indicator mounts allow for either stem or standard lug mounting.
- Will accommodate gages with up to 4" travel

| Order No. | Description | Column Height | Throat Depth | Platen Size |
|-------------------|-----------------|---------------|---------------------------------|--------------|
| 54-580-112 | Dial Gage Stand | 8" | 1 ³ / ₄ " | 2"Ø |
| 54-580-118 | Dial Gage Stand | 12" | 5" | 3 x 4" Rect. |
