

Fowler

Articulated Arm Magnifying Lamps

Fowler's new magnifying lamps are designed for demanding jobs in laboratory, quality control, inspection and assembly functions.

Only the finest clear crown optical glass lenses are used for less distortion and true color rendition. Illuminated magnifiers provide hands-free viewing for greater detail and reduced eye strain. No exposed springs means less parts to wear out and replace.

Both models are U.L. listed, have 3-conductor cords, come standard with 4.5" diameter 3-diopter lens and 22 watt circline bulb.

- 3 Diopter lens 1³/₄ X
- Offers three different mounting methods:
 - Screw tightening
 - Angle support plate
 - C clamp
- Base made of engineering plastic, are absolutely insulated, giving maximum safety without electric leakage interfering machine control circuits

▲ #52-630-145

▲ #52-630-133

Order #	Description
52-630-133	30" Magnifying Lamp
52-630-145	38" Magnifying Lamp
52-630-101	Optional 5 Diopter lens 2 ¹ / ₄
52-630-102	Replacement C Clamp
52-630-105	Replacement 22 watt bulb
52-630-322	Angle support plate
