

Helio Clamp

Special size centers are available, contact our technical department

Fowler/Helios introduces our new Helio Clamp vertical clamping system. Perfect for use with height gages, the Helio Clamp holds components between centers allowing easy measurements.

Features:

- Spring loaded with 3/4"(20mm) stroke.
- Adjustable safety stop.
- Adjustable leveling pads.
- Option for use in horizontal position.

Specifications

Max. clamping range between centers	31.5" (800mm)
Max. center height (max. component radius)	3.937" (100mm)
Max. workpiece weight	66lb (30kg)
Squareness (in test direction)	0.002" (.05mm)
Diameter of centers	0.787" (20mm)

Order No.	Description
53-263-777	Helio Clamp, vertical clamping system
53-263-780	Support foot for horizontal use
