

M3 Tangent Circle Construction

The *Outside Tangent* circle is constructed from (3) probed circle features. These (3) measured circle features must be oriented such that a valid tangent circle could be constructed from them.

Procedure

- ✓ Measure the (3) circle features that will be contained within the constructed *Outside Tangent* circle.
- ✓ Select the MEASURE CIRCLE button.
- ✓ Select the (3) probed circle features from the feature list or part view.
- ✓ Press DONE to complete the circle construction. A *bolt circle* construction will be displayed.
- ✓ Press the CHANGE TYPE button to cycle through the circle construction types until the *Outside Tangent* circle is displayed.
