

Mx100/Mx200 Loading a License

License an Mx100/Mx200 Readout for a new options configuration using the following procedure:

Procedure

- ✓ Copy the MetLogix license file to the root location of a USB Flash Drive. The license file should have the filename format *mlxoptions_SN.txt*, where *SN* is the serial number of the readout you are applying the new license to. Put the USB Flash Drive into the USB port of the unit.
- ✓ Enter the Supervisor Password in the Mx100/Mx200 by going into *Setup-->Password* and entering *111004*.
- ✓ Go into *Setup-->System* and select the item *Import License*.
- ✓ A message should be displayed indicating *License imported successfully*.

Once the above steps are completed it may be necessary to enable a newly licensed option in Factory Options. To do this, enter the Supervisor Password, per step 2 above, and then going into *Setup-->Factory Options* and setting the desired option flag to *Yes*.
